

Company Profile

Your Software Partner for digital Laboratory Processes

The World of Samples
Revealed with a Click

EXPERTISE AND COMPETENCES

qualitytype GmbH is your software partner for efficient digital laboratory processes. Since more than 20 years, our customers have benefited from the expertise of our specialists in IT, biology, mathematics, forensics and physics. We focus on the development of specialized products and the implementation of individual software projects.

Our core competencies lie in the areas of cloud applications, case management and laboratory management for forensics, special solutions for DNA analysis and software development for laboratory equipment and medical products. You can rely on our promise of service and quality - from consulting to development and validation support to training.

Quality and Reliability

Our quality management system is certified according to ISO 9001:2015. Our solutions meet the current requirements for data security and documentation. Our experience in working together with police laboratories and criminal investigation departments, for example, speaks for itself. You can rely on our expertise.

SERVICE AND TRAINING

Process Consulting of individual Software Projects

In order to record your processes and to implement them into our systems, consulting is critical for the success review the status quo. On this basis, our consultants will provide recommendations for implementing and optimising processes. All these recommendations will be documented in the subsequent target analysis.

Validation Support

Computer-based systems in pharmaceutical and medical-technical companies need to be validated as the usage may impact patients' safety, product quality or data integrity. We therefore support all essential steps from risk management, validation and qualification of software solutions to implementation and optimisation of quality management systems. Additionally, planning and implementation of validation projects is also part of our portfolio.

Courses and Training

After completing a project, we provide all users with the necessary skills for a professional application of the system. These courses and training programs are performed in small groups and help in providing the necessary acceptance for new software solutions with your employees. You determine the focus and therefore profit from a targeted qualification, resulting in a noticeable performance increase.

Fields of Application and Products

Special Solutions for DNA Analysis

- > kinship analysis: [GenoProof](#)
- > analysis of DNA mixtures: [GenoProof Mixture](#)
- > batch examinations: [MatchMaker](#)
- > chimerism analysis: [ChimerisMonitor](#)

Software for Lab Equipment and Medical Devices

- > device software: [Modaplex](#)
- > evaluation software: [Modaplex Result Analyser](#)
- > laboratory automation: [SAMPLES](#)
- > individual solutions according to your needs*

Lab and Case Management Systems

- > complete solution forensic: [Abetter Forensic Solution](#)
- > case management: [Abetter Case Management](#)
- > forensic molecular biology: [Abetter LIMS DNA](#)
- > fingerprints: [Abetter Dactyloscopy](#)
- > impression evidence: [Abetter Impression Evidence](#)
- > toxicology & narcotics: [Abetter LIMS TOX](#)
- > exhibit classification: [Abetter Item Keyword Management](#)
- > cloud-based sample management: [SAMPLES](#)

Quality Monitoring

- > quality monitoring animal health & food: [VetProof](#), [Qualiproof](#)
- > cloud-based sample management: [SAMPLES](#)
- > individual solutions according to your needs

Member of the Molecular Diagnostics Group

The Molecular Diagnostics Group (MDG) is the company association of Biotype, qualitype and ROTOP Pharmaka, combining expertise in molecular diagnostics, radiopharmaceutical heranostics and bioinformatics. We aim to develop innovative methods for analysis and diagnostics within life science. The MDG combines the strengths of each company to comprehensively face the challenges of personalised healthcare in diagnostics and therapy.

We look forward to seeing you!

You can always find the details of events as well as our other activities up-to-date on our website - it's worth taking a look: www.qualitype.com.

*also IVDR-compliant

Our quality management system is certified according to ISO 9001:2015.

Status of information: 05/2022
