According to studies, approximately one-quarter of valuable laboratory time is wasted on non-value-added activities. SAMPLES allows you to unlock this optimization potential. With our web application, you can professionally organize your samples, analyze them efficiently, and smartly automate processes – all without the need for extensive training.

Your sample management

You want to organize samples efficiently – from order entry to sample storage. With SAMPLES, this can be done in no time – without training or long familiarization.

Your individual processes

Your lab is not like any other. Neither are the processes. That's why SAMPLES offers you a wide range of options to customize the application to your needs.

Your webapp – your freedom

SAMPLES is web-based, giving you and your team the flexibility to work, schedule or approve from anywhere, regardless of location.

Available features:

- 🕢 Orders
- ✓ Samples
- ⊘ Sample storage
- ✓ Examination targets
- ⊘ Parameters & Results
- ♂ Instrument management
- Configurable methods
- ✓ Batch analysis
- Multiple runs per sample
- ✓ Release process
- ⊘ Archiving of samples
- ✓ User defined fields
- ✓ Versioning
- ⊘ Audit trail & Timeline
- Second Excel exports of all lists
- 🔗 GraphQL API
- ✓ HL7 FHIR

Find more packages on our website at www.samples.app/en

Configure your methods yourself

Your laboratory not only knows standard, but has special own procedures. That's why SAMPLES allows you to configure methods yourself – whether for daily routine or according to the requirements of your clients.

Document your results

According to studies, laboratories invest a quarter of their time in important but non-value-added activities. You too so far? Then it's time for SAMPLES! It supports you efficiently with the documentation.

Integrate with your infrastructure

The open software architecture (GraphQL) allows SAMPLES to be optimally integrated into your existing IT infrastructure. And: if your requirements change, SAMPLES simply grows with you.

Connect your labware

You want to fully automate your laboratory processes and connect devices such as balances, pipettes, analyzers, etc.? Then SAMPLES is the right choice, because it offers a SiLA-2 interface, LADS and a Lab Execution System (LES). Our automation experts will be glad to provide you with advice and support – even for individual solutions. Your secure webapp:

SAMPLES is web-based, giving you and your team the flexibility to work from anywhere, regardless of location. We pay special attention to data security: Your data is stored on servers in Europe and benefits from the high security standards of Microsoft Azure Cloud Security.

Simple data exchange and direct use of external tools:

You always have control of your data. You decide if and when you want to export and process them, for example, in Excel format. Furthermore, would you like to use platforms such as Jupyter Lab or R? No problem with SAMPLES.

Launch. Test. Conditions.

Test SAMPLES without obligation. Find more information and our attractive conditions on:
